

Increasing role of LNG as “Transition Energy”

10th LNG Producer-Consumer Conference
Presented by Sucheela Suwan

New vision for future energy trend

Powering Life with Future Energy and Beyond

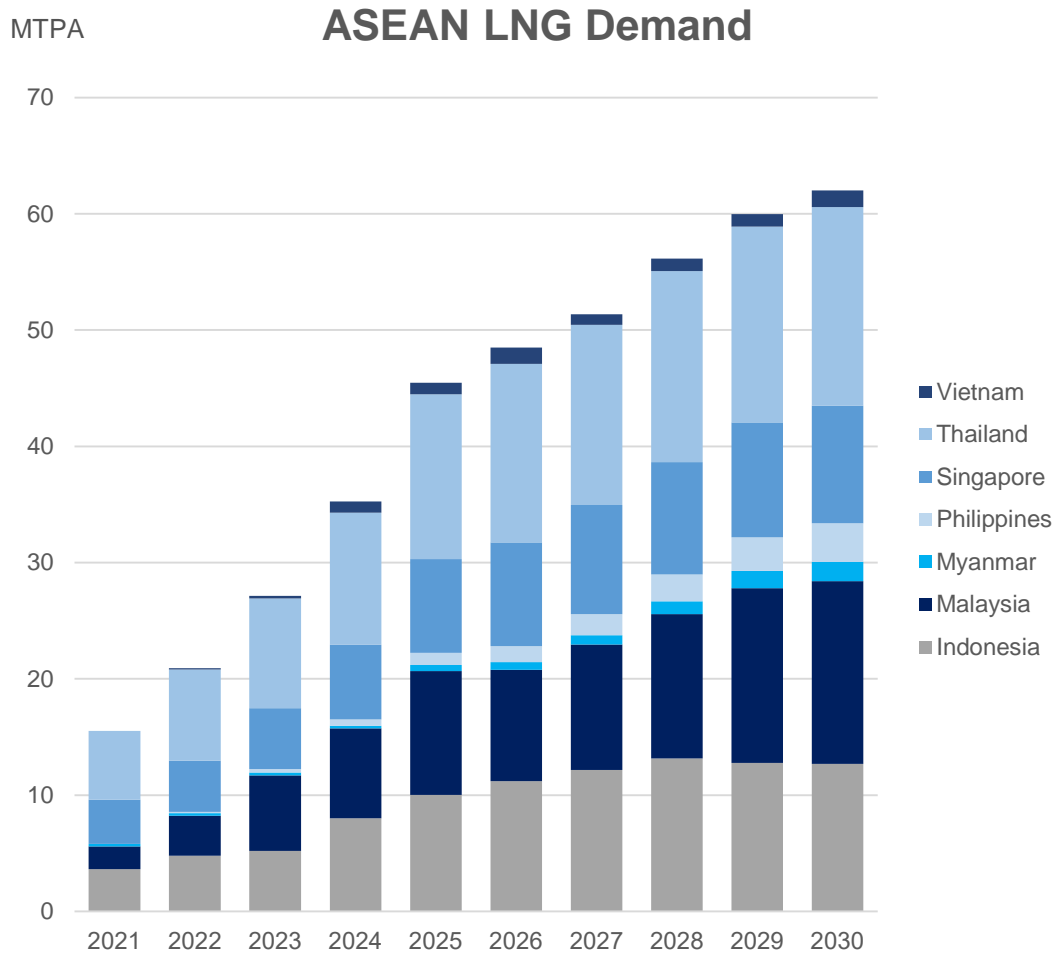

**Aim to achieve Carbon Neutrality
By 2065-2070**
(align with "National Energy Plan")

**Aim to reduce GHG emission
15% by 2030**

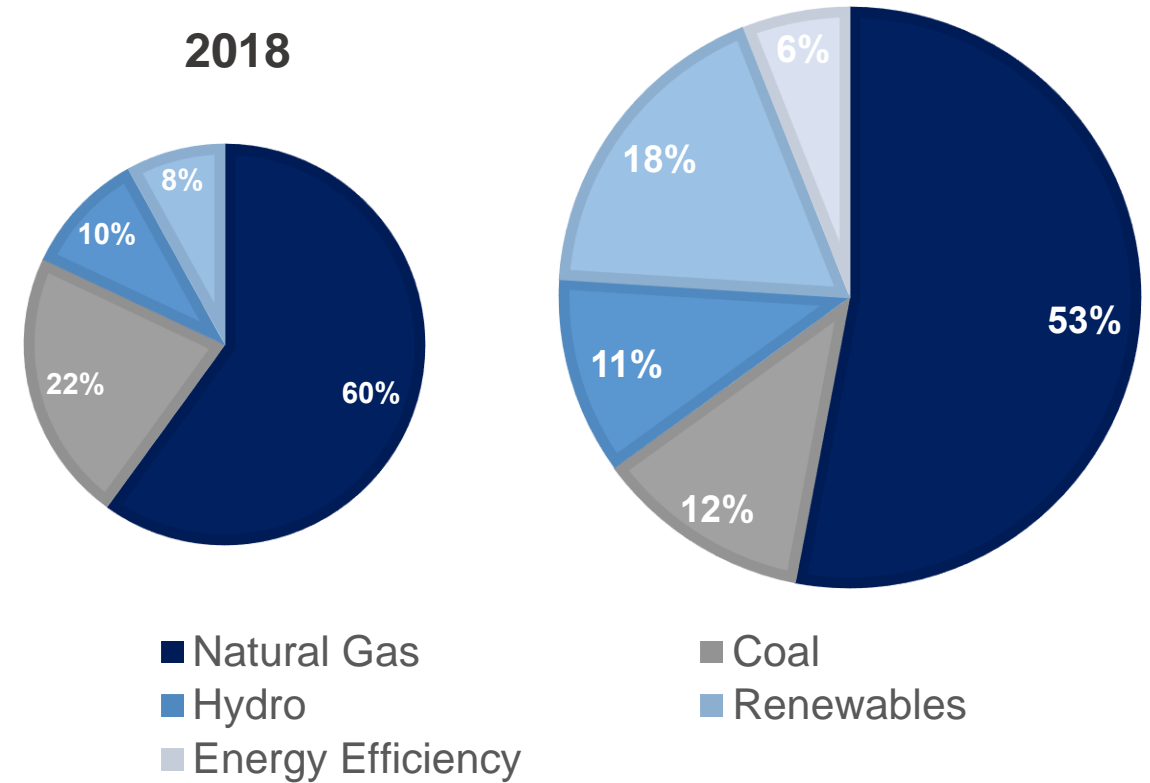

Moving toward future energy and energy technologies which are clean and environmental friendly as well as stepping into new potential businesses that support people live and drive people well-being

Growing energy LNG demand in ASEAN

Thailand Power Development Plan 2018 (rev 1) 2037

Source EPPO

Role of LNG in the energy transition

- ❑ LNG Price Mechanism
- ❑ LNG Infrastructure/
LNG Hub

- ❑ Greener LNG
- ❑ Technology to improve efficiency and provide customers with the best solution

- ❑ Renewables + **Energy Storage** or **LNG**
= Reliable Energy

POWERING LIFE
with **FUTURE ENERGY** and **BEYOND**
ขับเคลื่อนทุกชีวิตด้วยพลังแห่งอนาคต

Thank you
